

SIGN REQUIREMENTS:

Where a condition of approval for a development application requires a TDSB sign advising on the status of local school accommodation, the following specifications should be followed:

- One sign at each access point, unless otherwise agreed.
- Sign dimensions are 4'x 5', made of wood or corrugated plastic, with wording as stipulated and arranged consistent with the example below.
- The sign is placed 5 - 6 feet above ground on two posts (4 x 4). Where construction hoarding is erected along the site frontage, the sign may be placed on the construction hoarding.
- Lettering is 2 inches in black for the main body (on white background) and 1 inch lettering on the bottom right identifying the TDSB Planning Department.
- The Logo and QR Code should be included as shown in the example. The applicant shall adhere to the TDSB graphic standards and shall not manipulate the TDSB logo in any way. The TDSB logo shall be printed in two colours, PMS 369 green and black.
- The font to be displayed is shown on the example provided.

In order for TLC to issue the City of Toronto Planning Division with a clearance letter for the condition, a photo(s) of the sign in situ, with its text legible in at least one photo, should be provided to the relevant TLC planner for review.

The Toronto District School Board Welcomes You!

Every effort is made to accommodate students at local schools. Due to increasing enrolment, local schools may not have space for students from this address. If this is the case, students will be sent to other schools with available space. Students may be bussed until space becomes available locally.

For information, please scan the QR Code, visit <https://www.tdsb.on.ca/About-Us/Strategy-Planning/Managing-Enrolment-Growth-from-New-Residential-Developments> or call 416-394-7526.
